

### Citycircle Webinars during COVID-19 lock-down

Citycircle project kept rolling throughout the recent COVID-19 induced lock-downs across Europe. We continued to work and used the available communication technology in order to hold four interesting Webinars in order to develop their local circular economy strategy and design the circular economy hubs to be implemented in each region.

The Webinars were held from late February to early May 2020 and produced interesting insights based on the following subjects:

- How Cities around Europe cope with transition to circular economy and what they have done (good practice cases)
- What is a web-based market place for circular economy (examples)
- How to setup circular economy hubs, with examples from Maribor (Slovenia), Kemi (Finland) and Flanders (Belgium)

Please visit [Citycircle Website](#) to get all the information on webinars, access training materials that were produced and be sure to explore the latest Circular and project news.

### New Circular Economy Guide by the The European Investment Bank (EIB)

The Guide provides information about Bank's lending and advisory activities and communicates how EIB can further support the transition to a circular economy.

The pledges to update the document as it's understanding of circular economy needs, opportunities and risks deepen and with growing experience with the appraisal and financing of circular economy projects.
