

Bürgerstiftung für Erneuerbare Energien und Energieeinsparung

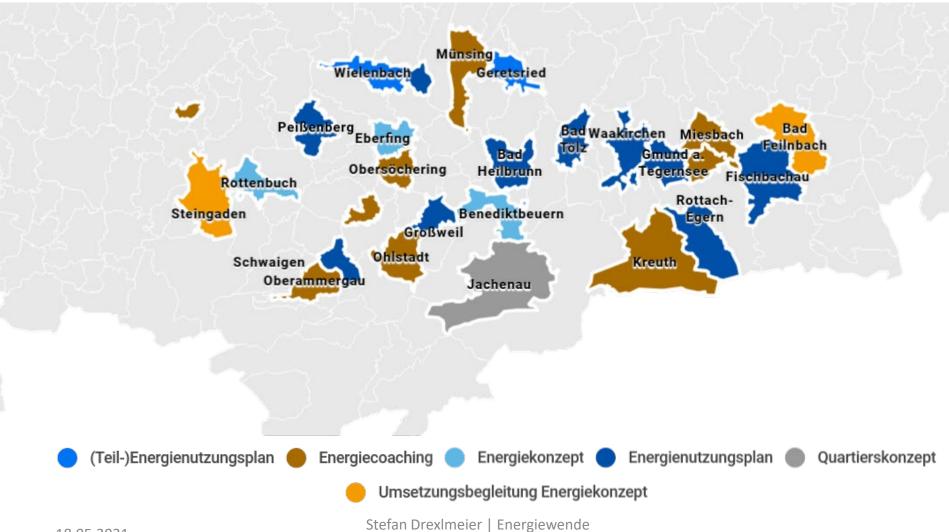

Erneuerbare Energien

Our origin is stakeholder engagement

Energy planning in municipalities

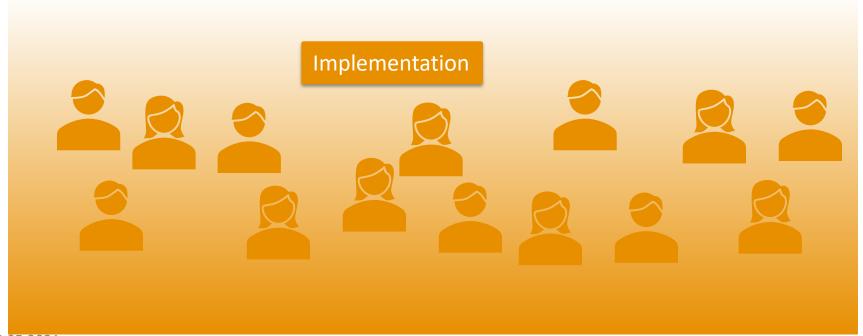

Funding Scheme in Bavaria for SEAPs

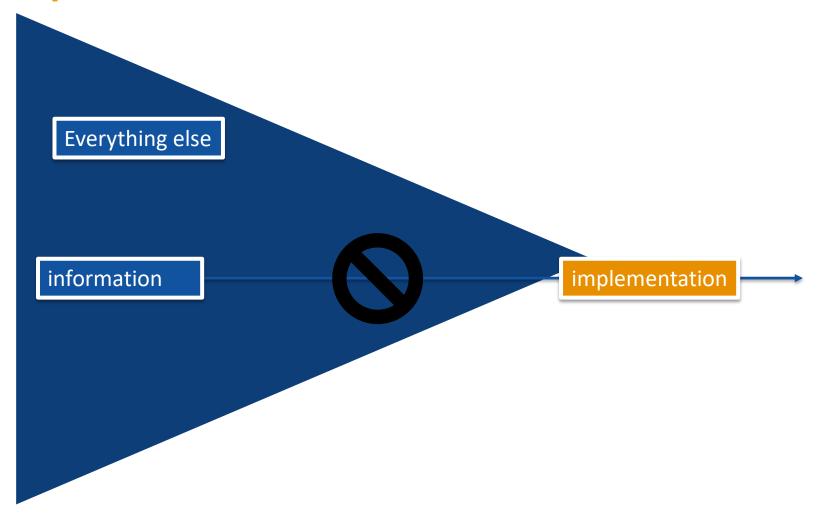

- Analysis
- Potential
- Measures
- Limited support for implementation of measures
- Stakeholder engagement

Our philosophy

Implementation is non-linear

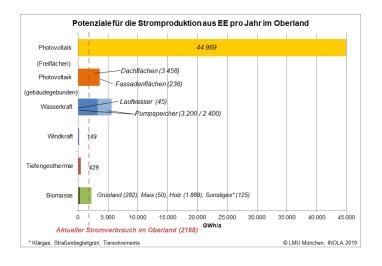

Let's create a button that solves it all...

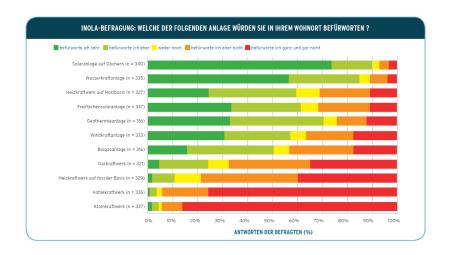

Research shows

Data is important... but not everything

Opinions count a lot!

scenarios

Business as usual

Crisis motivates regions

Benefit: Market knowledge

This project receives funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 847087.

Report D3.1 shows the socio-economic motives and mind-sets of REPLACE's key stakeholders, their perceptions, attitudes and motives in respect to sustainable heating and cooling. The survey's focus in the nine pilot regions was on heating and cooling equipment replacement issues, market conditions and observations and on related collective actions. Investors additionally were asked about heat supply models and demand response related activities.

- Meet in person
- Create trust
- Know background
- As early as possible
- Offer financial participation
- Create identity through energy projects

Create added-value for people attending your workshops / events etc.

- Latest insights
- Best-practice examples
- funding opportunities

How we incorporate these findings in energy planning development

ESCO, installers, politicians
