

REIF - REGIONAL CAPACITY BUILDING WORKSHOP

Online workshop

Minutes

12 July 2021

Introduction

Intermodal Transport Cluster held an online Regional Capacity Building workshop with representatives of multiple Croatian port authorities. This workshop was an opportunity for KIP to present the REIF project, its plans and goals set for the future of the project as well as discuss with relevant stakeholders which result or output they believe will most impact their operations.

Attendees list

Name	Organisation
Đoni Štambuk	Port of Zadar Authority
Gordana Mrčela	Port of Šibenik Authority
Čedo Petrina	Port of Šibenik Authority
Joško Berket Bakota	Port of Split Authority
Kristina Laptalo	Port of Dubrovnik Authority
Tomislav Batur	Port of Ploče Authority

Marijan Cukrov	Intermodal Transport Cluster

Agenda

REIF Regional Capacity Building online workshop

12.07.2021

Agenda

11:00 - 11:10	Introduction and welcome	KIP
11:10 - 11:30	REIF presentation - project results and goals	KIP
11:30 - 12:00	Roundtable: the uptake of the project's results	All participants
12:00 - 12:15	Workshop recap and conclusions	KIP

Introduction and REIF presentation

Mr. Marijan Cukrov welcomed all the participants of the Regional Capacity Building workshop, presented the agenda and explained the overall objective of the workshop. He introduced Ms. Tanja Vujnović Kereš who then presented the REIF project, the achievements so far within the project, as well as future goals to be achieved to all the participants. She has presented the bottleneck analysis, the priority list of actions for Croatia, as well as the policy recommendations. She mentioned that the project will soon be entering its final period, and has presented what is planned to be accomplished before the end of the project.

Round table

The round table was an opportunity for all participating stakeholders to ask questions about the project and how the project will achieve its goals, especially focusing on data and information relevant for Croatian ports which have access to rail infrastructure in operation. It was discussed which results and outputs will have the most meaningful impact on the overall usage of rail to transport cargo from the ports, and whether these results will differentiate depending on the different type of rail infrastructure (electrified, non-electrified, main line, branch line or freight only line) available to each port.

Recap & Conclusions

Mr. Cukrov concluded the workshop by giving a short recap on all topics discussed in the past hour, he gave a conclusion about the project and its goals. Before closing the workshop, he thanked everyone for joining the workshop and expressed his wishes to meet in person for the next event, if the situation allows it.
