# PRIORITY 3: ENVIRONMENT & CULTURE

Examples of actions supported:

Strengthening the capacity for environmental planning and management at the level of functional urban areas

Harmonising environmental management concepts for risk prevention and the reduction of negative climate change impacts

Strategies and tools to manage and improve environmental quality (air, water, waste, soil, climate)

Integrated strategies for the rehabilitation and reactivation of brownfield sites

Integrated strategies and tools to sustainably use natural resources for regional development

TOWARD A REGIONAL APPROACH TO LAND USE

While land use is generally regulated on a local level, protecting the environment requires addressing land issues in broader regions. LUMAT brings together environmental agencies, researchers, and city and regional authorities. They cooperate to help prevent undesired spatial patterns of urban sprawl and land degradation in seven central European regions. The project will use its international knowledge base to develop sustainable regional land management strategies.

REGENERATING POLLUTED BROWNFIELD SITES

With an estimated three million sites affected by pollution, Europe faces real challenges in improving brownfield areas. GreenerSites brings together an international partnership to develop nine regional action plans for cleaning up and regenerating unused or underused industrial areas. The project will also provide a common tool for brownfield regeneration and implement 11 pilot actions to test sustainable and innovative solutions.

# CALL 4: CAPITALISATION THROUGH COORDINATION

## Thematic focus on 7 topics

P.1 INNOVATION

I. Industry 4.0/advanced manufacturing

II. Social entrepreneurship

P.2 LOW-CARBON

III. Energy efficient renovation of public buildings

IV. Low-carbon mobility and urban air quality

P.3 ENVIRONMENT & CULTURE

V. Climate change adaptation and risk prevention

VI. Cultural heritage sites and buildings at risk

P.4 TRANSPORT

VII. Accessibility of peripheral and border regions to TEN-T CNC networks/nodes
