

# INCREASED RENEWABLE ENERGY AND ENERGY EFFICIENCY BY INTEGRATING, COMBINING URBAN WASTEWATER AND WASTE MANAGEMENT SYSTEM

TAKING  
**COOPERATION**  
FORWARD

REEF 2W Final Conference 26/06/2020

## Summary of main results and outlook

Roberto Farina, ENEA - Diego Santi, Montefeltro Servizi

# REEF 2W MAIN RESULTS - 1

- The state of the art of technology has been established
- A complete set of operative tools and methodologies aimed at assessing the soundness of specific implementations have been realized, based on an integrated sustainability approach
- Legislative obstacles and barriers for REEF 2W implementations have been analysed and suitable suggestions/recommendations for policy makers have been set up
- The methodologies have been tested in 5 pilot demonstration cases

# REEF 2W MAIN RESULTS - 2

- Training courses for public administrators on the advantages of the REEF 2W approach have been realized
- A register of qualified experts for training/assisting public administrations has been established
- Actions plans aimed at including the REEF 2W approach in the energy and territorial planning at a regional level have been drafted and suitable MoU have been signed with local administrations

# AFTER THE TERMINATION OF THE PROJECT...

The web site [www.interreg-central.eu/reef-2w](http://www.interreg-central.eu/reef-2w) will still provide

## INFORMATION

- On the REEF 2W issues
- On the experiences gained during the project
- On the pilot demonstration cases

# AFTER THE TERMINATION OF THE PROJECT...

The web site [www.interreg-central.eu/reef-2w](http://www.interreg-central.eu/reef-2w) will still provide

## ACCESS

- To the REEF 2W Tool
- To the guidelines, reports and documents
- To the strategies and action plans set up during the project

# AFTER THE TERMINATION OF THE PROJECT...

The web site [www.interreg-central.eu/reef-2w](http://www.interreg-central.eu/reef-2w) will still provide

## ASSISTANCE

- Direct contacts with the project partners that committed themselves to continue their collaboration for the exchange of information and experiences; project partners are available for providing public administrations and multi-utilities with preliminary evaluations on possible new REEF 2W implementations
- A register of experts/advisers, trained on the use of the REEF 2W tools and methods, that are available for deeper assessments on the best solutions for the energy management of plants and cities.

# LASTLY

## THE BOOK “*Sustainable REEF 2W implementation experiences and lessons learnt*” IS AVAILABLE

The book is intended as guidelines for public administrations and shows how the best result both economically and environmentally can be achieved through a dialogue between public administrations and multi-utilities.

*The REEF 2W Team thanks all of you  
For attending this conference*
