BEST PRACTICE DAY ON-LINE CONFERENCE 01. 10. 2020

Forecasts and best practices with attributes smart, agile and local (in production and supply chains) are key to doing business in the new - digital - reality.

The industrial revolution of the 21st century marks the transition to the so-called Industry 4.0. The year 2020 has brought us a leap into digitalisation of an unprecedented extent. Companies have found that digital is essential and strategically extremely important for the future.

The purpose of the conference is to emphasize the new digital reality and the need for a thorough consideration and forecast of future developments. The conference will present local and international best practices in the field of production and supply change management.

The conference is intended for experts and decision-makers from companies who are involved in current processes of digital transformation, especially in the field of production, development and finding new sales and supply routes.

4 STEPS project is addressing the main challenge of Industry 4.0 as tool towards a new, digital industrial revolution holding the promise of increased flexibility in manufacturing, mass customisation, increased speed, better quality and improved productivity and its development is supporting the RIS3 in the target regions in the different sectors.
