April, 2022

4STEPS newsletter

Dear reader, we are proud to announce that the 4STEPS project has successfully concluded. We have achieved great results and made considerable efforts in addressing the main challenges in industrial 4.0 as a tool toward a new, digital industrial revolution.

The main project objective was to support the successful RIS3 implementation by applying the I4.0 to all the industrial sectors identified by each region.

Transnational tool of innovative services

A tool was developed in order to identify the best services provided within the pilots to be transferred among all the DIHs and beyond. This will ensure that the services are of the highest quality and meet the needs of those who will be using them.
