CITYCIRCLE

Varaždin's Citycircle pilot starts on the green-market

In a short ceremony held on July the 1st 2020, the activities of Varaždin's pilot project within the scope of Citycircle have symbolically started.

All 83 tenants of the green-market have been allotted waste-separation bins in order to introduce Circular Economy principles in the real-life context of the place that citizens of Varaždin consider the heart and soul of their city.

Green-markets have immense economical and social significance in Croatian culture and are a perfect place to introduce the ideas of the Circular Economy to the wider audience in a "good practice" manner.
