

OUTPUT FACT SHEET

Tools

Version 2

Project index number and acronym	CE1578 CityWaterCircles
Output number and title	O.T1.2 Digital Learning Resources in EN & tailored national versions on circular urban water use
Responsible partner (PP name and number)	Poliedra PP4
Project website	https://www.interreg-central.eu/Content.Node/CWC.html
Delivery date	June 2020

Summary description of the key features of the tool (developed and/or implemented) and of its transnational added value

The DLRs in Italian deal with the following topics: Smart Water Governance, Sustainable Water Management, Water Efficiency, Water Losses reduction, Rainwater management, Greywater recycling. The DLRs in Italian address the challenge of having a tool able to support the creation of a shared language and a shared knowledge base on circular water management in Italy. They are targeted at the personnel and stakeholders of the Italian municipalities, but also at the regional and national level to build integrated strategies at all levels of government.

The DLRs in Italian were built based on the DLRs in English previously produced in the project, adapting them to the Italian context according to the analysis of the main local peculiarities and priorities and on the suggestions of the Turin SG. The process included testing the training materials in Italian with the SG of the Turin FUA-and revising it according to the indications received.

NUTS region(s) where the tool has been developed and/or implemented (relevant NUTS level)

ITC11 Italy, Piemonte region, Torino province

Expected impact and benefits of the tool for the concerned territories and target groups

The DLRs in Italian are a tool able to support the creation of a shared language and a shared knowledge base on circular water management in Italy. Therefore, their expected impact is to increase the knowledge on circular water management issues and their ability to take actively part to strategy building processes for circular water management.

The DLRs in Italian are free access resources. They are specifically targeted at the personnel and stakeholders of the Italian municipalities, but also at the regional and national level to build integrated strategies at all levels of government.

Sustainability of the tool and its transferability to other territories and stakeholders

The DLRs in Italian are free access resources available on CWC website. For their nature, the DLRs are easily accessible from any location.

The process of stakeholder engagement which had the DLRs as its core is giving good results in Torino FUA, leading to well structured Strategies and a feasible Action Plan.

References to relevant deliverables and web-links

If applicable, pictures or images to be provided as annex

The main relevant reference documents are the following deliverables:

D.T1.3.5 - Comprehensive Digital Learning resource (DLR) on circular urban water use in EN

D.T1.4.1 - FUA-level demand assessments on the key place-based training paths

D.T1.4.2 - Digital training materials in national languages tailored to local competence building needs

D.T1.4.3 - Feedback and evaluation reports on the FUA-level competence building WSs held for SGs

The DLRs in Italian are learning material available on CWC website at the following address:
