This document has been issued within the project ENTeR (CE 1136) thanks to the funding received from the European Union under the Interreg Central Europe Programme (2nd call 2016)

This document reflects only the authors' view and neither the European Commission nor the Interreg Central Europe Managing Authority are responsible for any use that may be made of the information it contains.

ENTeR – Expert Network on Textile Recycling

ENTeR works in five central European countries that are involved in the textile business, to promote innovative solutions for waste management that will result in a circular economy approach to making textiles.

The project will help to accelerate collaboration among the involved textile territories, promoting a joint offer of innovative services by the main local research centres and business associations ("virtual centre"), involving also public stakeholders in defining a strategic agenda and related action plan, in order to link and drive the circular economy consideration and strategic actions.

The approach of the proposal and the cooperation between the partners are oriented to the management and optimization of waste, in a Life Cycle Design (or Ecodesign) perspective.

1. Introduction

The waste database was planned to be a key output of the “ENTeR” project. The partnership involved multiple textile-industry-related companies.

The on-line platform “M3P” is a web-based tool, developed in open-source language, based on a database, to help the material match making between the companies offering “waste” and those requesting raw materials. It will be accessible from everywhere, companies can collaborate each other, both in partner/CE regions and outside. The database contains characteristic data (mechanical, chemical and ecological characteristics and performance) of all materials/waste produced by the textile companies.

Involved companies:

	# WASTE	# Companies
TOTAL	545	259

Companies registered in M3P Platform:

	# WASTE	# Companies
TOTAL	183	101

2. Methods used for the construction of the textile database

The partners initially involved the companies for the various activities (e.g. questionnaires, site visits, surveys, etc.), verifying at the same time interest and applicability to an online tool for sharing waste.

This led to the collection of various off-line information relating to companies and waste.

Subsequently, companies were invited to register on the M3P Platform (not compulsory and free of charge). Many companies agreed and used the Platform, while several others did not register themselves, mainly due to lack of time.

1. Off-line textile waste database

Germany:

Objective of the data collection has been the identification of companies from the Saxon textile and clothing sector generating different types of production waste followed by the collection of information on composition and quality of waste as well as the quantity (waste streams). The

survey focused on production residues coming from production processes, such as weaving, knitting, finishing, production of nonwovens and technical textiles.

The companies were selected from:

1. Interviews/Questionnaires carried out/completed within work package WP T1 “Textile Waste & Recycling”/A.T.1.1 “State of the Art Textile Waste Management and Recycling”,
2. The stakeholder group known from joint R&D projects,
3. The stakeholder group known from special events organised by STFI (for instance colloquium “Recycling for textiles”).

STFI collected the data of 10 companies including 20 wastes. After mapping the companies, STFI sent e-mails to all selected SMEs. After a short presentation of the database, the companies were asked to register and include their data/wastes by themselves into the platform or to send their permission that the data input into the platform can be done by STFI.

Unfortunately, the companies did not use the chance to do an entry. A feedback has been asked for. The reasons can be seen in the following issues:

- A) The registration procedure is quite complicated and not self-explaining.
- B) The same is mentioned for the handling of the platform which is not self-explaining, too.
- C) The companies cannot find relevance for their own company. For instance, the waste type is displayed but no provenience of the waste. This makes it difficult for the companies to assess the benefit of asking for further information.
- D) Connected to the GDPR we asked all companies for the permission that STFI adds their data into the platform. Unfortunately, we did not get the permission of the companies to use the data for the Waste Database and the M3P platform, respectively. Therefore, an input by STFI is not possible due to the missing permissions.

Italy:

The Italian part created an offline database and below we explain the work done.

The ENTeR project has studied - through research and intervention actions - the recycling and reuse of textile waste, in order to support companies in the sector, safeguard raw materials and prevent the consumption of non-renewable resources.

Among the different objectives of the project there is also the mapping of industrial waste.

In collaboration with SMI, Sistema Moda Italia - Textile and Fashion Federation, in this research this mapping was mainly addressed to SMI member companies.

The survey focused on production residues (pre-consumer waste) resulting from all types of businesses (combing, spinning, weaving, finishing, packaging).

The aim of the research was to identify industrial waste from companies in the textile-clothing sector in quantity, quality and production location.

The research was conducted by the Textile Cotton and Clothing Spa Center (Centrocot), at the request of SMI, Sistema Moda Italia - Federation of Textiles and Fashion. The territorial

associations of Confindustria collaborated in the research with a strong presence of industries in the sector, in particular: Confindustria Como, UIB - Unione Industriale Biellese, UNIVA - Union of Industrialists of the Province of Varese.

The survey was conducted through the administration of a questionnaire, developed by the Textile, Cotton and Clothing Center and previously tested on a sample of companies. The questionnaire was sent by SMI directly to all associated companies (number: 434) and sent to the territorial associations of Confindustria to promote it among their associated companies. The questionnaires were collected in the period October - December 2019.

Czech:

INOTEX and ČTPT focused their effort together on the same target group of companies. To map the industrial textile waste streams in Czech Republic, the companies were contacted via questionnaire (Annex 2) during the period January - April 2018. Both partners encouraged the companies to respond to questionnaires during the events organized by ČTPT (workshops, General Assembly of ČTPT)

The target group comprised of 75 companies (textile and technical textile producers, clothing producers and textile waste processors and users). In addition to this, the questionnaire was also sent via the Laundry and Drycleaners Association of the Czech Republic to 27 laundries offering the rental service of the laundry.

The survey aimed to map the type of the industrial textile waste generated or processed by contacted companies (material composition, physical form, annual volume) and their management depending on the production profile of the company.

As a feedback, we collected 22 questionnaires with answers: 8 from technical textiles manufacturers, 8 from manufacturers of other textile (fabrics for clothing and/or furniture, fibers), 1 from clothing company (PPE manufacturer), 1 from company operating the separated collection of end-of-life textiles, 2 from companies processing or using textile waste, 1 from company using recycled PET bottles to produce PES fibers and 1 from commercial laundry.

The information collected via questionnaires were provided to responsible ENTeR partners for further processing in relevant deliverables.

Hungary:

The Hungarian partners tried to identify the related textile and clothing sector by questionnaires. The survey focused on production residues coming from production processes, such as weaving, knitting and technical textiles, etc.

The companies were selected from:

- I. Interviews/Questionnaires carried out/completed within work package WP T1 "Textile Waste & Recycling"/A.T.1.1 "State of the Art Textile Waste Management and Recycling",
- II. Stakeholder groups

The two Hungarian partners successfully collected the data of 11 companies with their wastes. After the mapping, the partners started to involve the companies to use the M3P platform and update their information. Unfortunately, due to their respective GDPR rights and other below mentioned reasons they didn't want to share their information.

- A) The registration procedure is complicated and not self-explaining.
- B) Companies had language difficulties (the platform wasn't available in Hungarian language)
- C) Using the platform is difficult, takes too much time
- D) GDPR issues

Poland:

IW and PIOT worked together on the same target group of textile companies. To map industrial textile waste streams in Poland, companies were involved via questionnaire (Annex 4). Both partners encouraged companies to answer the questionnaire in order to have textile companies and to register the waste produced by them.

The Polish partners also selected the companies, to which they submitted the questionnaire for the construction of the database, among those encountered in past activities such as:

- Interviews / Questionnaires carried out / completed within work package WP T1 "Textile Waste & Recycling" / A.T.1.1 "State of the Art Textile Waste Management and Recycling",
- Stakeholder groups

In particular, the Polish companies involved are 20, while the registered waste are: 54.

After completing the questionnaire (Annex 4), the two partners worked on the M3P platform. Polish partners and companies were involved in the registration and use phases of the M3P platform. All Polish companies involved in the construction of the tool (textile waste database) have decided to register and use the M3P platform.

2. Online textile waste database (M3P Platform)

The M3P Platform, based on a waste database, allows to enhance the use of material resources, acting as material match making system to support to find a better use of waste.

In this context, the partners worked by designing a database that would tag the specifications and characteristics of the waste in order to facilitate the automatic processing of Material Match.

In fact, the database contains characteristic data (mechanical, chemical and ecological characteristics and performances) of all materials / waste produced by textile companies.

3. Textile waste database

- ≤ 1
- > 1 fino a 5
- > 5 fino a 10
- > 10 fino a 50
- > 50 fino a 100
- ≥ 100

A4 – Campo tecnologico (sono possibili più scelte)

- Filatura
- Tessitura
- Maglieria
- Tessuti non tessuti
- Pizzi e ricami
- Nobilitazione e finissaggi:
- Abbigliamento:
- Riciclo tessile
- Altro

A5 – Segmento produttivo (Sono possibili più scelte)

- Abbigliamento
- Arredamento
- Tessili tecnici
- Accessori (zip, bottoni etc.)
- Altro

Osservazioni:

Parte B – Rifiuti: quantità (annuali), recupero e smaltimento

B1–Tipologia di rifiuti tessili

(sono possibili più scelte - Se si è dotati di un sistema di separazione degli scarti inserire le quantità annue per composizione anche se afferenti allo stesso CER.)

Informazioni aggiuntive:

B4 – Attuale riciclo dei prodotti tessili (riutilizzati in altri processi produttivi con o senza preparazione internamente o presso aziende esterne)

Destinazione	Quantità [kg]	Costi (C) [€/kg]	Ricavi (R) [€/kg]

B5 – Smaltimento (il rifiuto non viene riutilizzato in processi produttivi)

Metodo di smaltimento	Quantità [kg]	Costi (C) [€/kg]

Osservazioni:

Parte C – Valutazione della situazione da parte dell’azienda

C1 – Quali sono le ragioni della mancanza di recupero degli scarti? (Sono possibili più scelte)

- Carenza tecnologica
- Gestione di processi troppo impegnativi (separazione, stoccaggio, logistica)
- Scarso interesse economico
- Aspetti normativi
- Mancanza di informazioni
- Mancanza di risorse
- Altro (specificare)

SWOT analysis (C2-C5)

C2 – Quali sono i “punti di forza” per il riciclo dei vostri scarti tessili? (Sono possibili più scelte)

- Composizione singola
- Gestione separata dei rifiuti (sorting)
- Grandi quantità
- Produzione costante dei rifiuti
- Rifiuti di valore
- Vicinanza con le aziende che effettuano il riciclo
- Altro (specificare)

C3 – Quali sono le “criticità” per il riciclo dei vostri scarti tessili? (Sono possibili più scelte)

- Rifiuti di composizione indefinita
- Piccole quantità
- Produzione discontinua
- Bassa qualità
- Elevata distanza dalle aziende che effettuano il riciclo
- Altro (specificare)

C4 – Quali sono le “opportunità” per il riciclo dei vostri scarti tessili? (Sono possibili più scelte)

- Riciclo interno (ciclo produttivo)
- Riuso in nuovi prodotti (propri o di terzi)
- Offerta dei rifiuti su piattaforme dedicate
- Investimenti in nuove tecnologie/richiesta di fondi
- Attività di ricerca e sviluppo (R&D)
- Altro (specificare)

C5 – Quali sono le “minacce” per il riciclo dei vostri scarti tessili?
(Sono possibili più scelte)

- Costi elevati
- Ulteriori investimenti per la soluzione di problemi di riciclo
- Basso apprezzamento da parte del mercato
- Rifiuti contaminati (polluted), ad esempio non processabili
- Vincoli normativi / fornitura (e.g. REACH) / vincoli di trasporto (certificati)
- Altro (specificare)

Grazie per la collaborazione

Il questionario compilato dovrà essere inviato entro il 31 ottobre 2019 a:

Roberto Vannucci roberto.vannucci@centrocot.it

Donatella Macchia donatella.macchia@centrocot.it

Con loro potete prenotare appuntamento telefonico per domande sulla compilazione

Accordo confidenziale

Tutti i dati saranno utilizzati solo per il Progetto ENTeR e, qualora necessario per attività del progetto, mostrati in forma aggregata. I dati saranno gestiti in modo confidenziale. Ogni valutazione di questi dati verrà eseguita in maniera anonima per fini interni al progetto.

- Si autorizza l'utilizzo dei dati trasmessi ai sensi del Reg. UE n. 2016/679 (GDPR) sulla tutela della privacy (obbligatorio)
- Si desidera rimanere informati sulle iniziative e l'avanzamento del Progetto ENTeR, anche mediante invio di newsletter e l'invito ad eventi inerenti al progetto stesso (facoltativo)

Dotazník Textilní odpady

Prosíme o laskavé zaslání vyplněného dotazníku na kontakt

chybova@inotex.cz

Ing. Olga Chybová
středisko ekologie
INOTEX spol. s r.o., Dvůr Králové n.L.
tel. 499 316 321
732 721 210

V případě jakýchkoli dotazů se kdykoli můžete obrátit na výše uvedený kontakt.

Část A – Obecné informace o společnosti

A1 – Kontaktní informace

Společnost	
Adresa	
Kontaktní osoba	
Telefon	
Fax	
E-mail	
Webová stránka	

A2 – Počet zaměstnanců

- ≤ 9
- 10 to 49
- 50 to 99
- 100 to 249
- ≥ 250

A3 – Roční obrat [mil CZK]

- ≤ 1
- > 1 up to 5
- > 5 up to 10
- > 10 up to 50
- > 50 up to 100
- ≥ 100

A4 – Výrobní technologie (možno zvolit více možnosti)

- Výroba vláken a přízí
- Tkání
- Pletení
- Výroba netkaných textilií:
 - vpichované
 - chemicky pojené
 - termicky pojené
 - jiné (uvědte)
- Výšivky, krajky
- Barvení/tisk
- Finální úpravy
 - nehořlavé
 - hydrofobní, oleofobní, nešpinivé
 - easy-care
 - měkčící
 - tužící
 - antibakteriální, protihrmyzové
 - jiné (uvědte)
- Laminování, zátěry
- Konfekce
- Recyklace textilu
- Prádelenský servis
 - praní
 - leasing / pronájem prádla (zdravotnická zařízení, hotely)
- Jiné

A5 – Vyráběný / zpracovávaný produktový segment (možno zvolit více možností)

- Textilie pro výrobu oděvní konfekce
- Textilie pro bytový a domácí textil
- Konfekce (oděvy, bytový textil, jiné)
- Zdravotnické textilie, pracovní oděvy
- Technické textilie
- Příslušenství (zipy, knoflíky atd.)
- Jiné

**A6 – Údržba a prádelenský servis (zdravotnické, potravinářské, hotelové
prádlo a pracovní oděvy)**

- prádlo vlastním a provádím údržbu sám
- využívám servise leasingové prádelny
- zajišťují prádelenský servis vč., leasingu

Poznámky:

Část B – Množství odpadu (roční), regenerace odpadu a odstraňování odpadu

B1 – Typ textilních odpadů (možno zvolit více možnosti)

Materiálové složení:

B2 - Další výrobní odpady, pro něž jsou hledány možnosti regenerace (možno zvolit více možností)

Papír, lepenka kg

Fólie/Filmy kg

Chemikálie kg

Dřevo kg

Jiné kg

Místo pro Vaše doplňující informace / bližší popis

B3 - Recyklace textilních odpadů (textilní odpad je opětovně používán s přípravou nebo bez přípravy ve vlastní nebo v externích společnostech)

Metoda recyklace	Množství [kg]	Náklady (C) Příjmy (R) [CZK]

B4 - Odstraňování (odpad není opětovně využíván ve výrobním procesu)

Metoda odstraňování	Množství [kg]	Náklady (C) Příjmy (R) [CZK]

Poznámky:

Část C – Posouzení situace z pohledu společnosti

C1 – Jaká je naléhavost hledání možností recyklace?

- Velmi vysoká
- Vysoká
- Střední
- Nízká
- Nevýznamná

Místo pro Vaše doplňující informace / bližší popis

C2 – Jaká je důležitost nákladů za odstranění odpadů ve Vaší společnosti?

- Velmi vysoká
- Vysoká
- Střední
- Nízká
- Nevýznamná

Místo pro Vaše doplňující informace / bližší popis

C3 – Jaké jsou důvody pro to, že odpady nejsou regenerovány? (možno zvolit více možností)

- Není k dispozici technologické nebo technické řešení
- Příliš vysoká náročnost registrace a zpracování (separace, skladování, logistika)
- Není ekonomicky zajímavé
- Legislativa
- Jiné

Místo pro Vaše doplňující informace / bližší popis

SWOT analýza (C4-C7)

SWOT: S = Strengths (Silné stránky), W = Weaknesses (Slabé stránky), O = Opportunities (Příležitosti), T = Threats (Hrozby)

C4 – Jaké silné stránky týkající se recyklace Vašich textilních odpadů vidíte? (možno zvolit více možností)

- Jednodruhový
- Separovaný odpad (třídění)
- Velká množství
- Pravidelná produkce odpadu
- Cenný odpad
- Krátká vzdálenost k recyklační firmě
- Jiné

C5 – Jaké slabé stránky týkající recyklace Vašich textilních odpadů vidíte? (možno zvolit více možností)

- Nedefinovaný odpad
- Malá množství
- Nepravidelná produkce odpadů
- Podřadný odpad (nízká kvalita)
- Dlouhá vzdálenost k recyklační firmě
- Jiné

C6 – Jaké příležitosti týkající recyklace Vašich textilních odpadů vidíte? (možno zvolit více možností)

- Recyklace odpadu ve vlastní společnosti (výrobní cyklus)
- Opětovné použití v novém výrobku (vlastní nebo jiná společnost)
- Nabídnutí odpadu přes recyklační výměnnou platformu
- Investice do nových technologií / žádost o dotace
- Aktivita v oblasti výzkumu a vývoje (R&D)
- Jiné

C7 – Jaké hrozby týkající recyklace Vašich textilních odpadů vidíte? (možno zvolit více možností)

- Vysoké náklady na zpracování
- Investice nutné pro řešení problému (dodatečné náklady)
- Nedostatečné poptávka trhu po recyklovaných produkt
- Kontaminovaný odpad (znečištěný), např. zpracování není možné
- Legislativa (např. REACH, látky SVHC, ...) / podmínky dodání (certifikáty)
- Jiné

C8 – Jak hodnotíte potřebu informací a vzdělávání v oblasti recyklace textilu?

- Velmi vysoká
- Vysoká
- Střední
- Nízká
- Nevýznamná

C9 – Zhodnocení regionální situace týkající se nakládání s textilním odpadem

(uveďte, prosím, Vaše zkušenosti, názory či podněty)

Vámi poskytnuté údaje budou považovány za přísně důvěrné. Jakékoli vyhodnocení těchto údajů bude provedeno pouze anonymně a v rámci zpracování projektu.

8. Annex 3 - Hungarian questionnaire

Textilhulladékra vonatkozó kérdőív

A rész) – Általános céginformáció

A1 - Kommunikációs adatok

Cégnév	
Cím	
Kapcsolattartó	
Telefonszám

**B2 - További gyártásközi hulladék, amikre visszanyerési lehetőséget keresnek
(több válasz is lehetséges)**

- Karton, papírlemez~~xxxxxx~~ kg
- Fólia~~xxxxxx~~ kg
- Vegyszerek~~xxxxxx~~ kg
- Fa~~xxxxxx~~ kg
- Egyéb~~xxxxxx~~ kg

B3 - Textilhulladék újrahasznosítás (a textilhulladék újrafelhasználása előkészítéssel vagy előkészítés nélkül a cégnél vagy külső cég által)

Újrahasznosítási módszer	Mennyiségek [kg]	Költségek (C) Árbevétel (R) [€]

B4 - Hulladék ártalmatlanítás (a hulladék nincs újrafelhasználva a gyártási folyamatokban)

Észrevételek:

C rész) – A jelenlegi helyzet értékelése a cég szemszögéből

C1 - Mennyire sürgős útirahasznotási módszereket találni?

- Nagyon magas
- Magas
- Kevésbé magas
- Alacsony
- Jelentéktelen

C2 - Milyen súlyval bírnak a hulladék ártalmatlanítási költségek?

- Nagyon magas
- Magas
- Kevésbé magas
- Alacsony
- Jelentéktelen

C3 - Mik az okai a visszanyerés hiányának? (több válasz is lehetséges)

- Nincs elérhető technológiai vagy technikai megoldás
- Túl nagy erőfeszítéssel jár a nyilvántartás és a teljes folyamat (elkülönítés, raktározás, logisztika)
- Gazdasági szempontból nincs jelentősége
- Jogi szabályozás
- Információ hiány
- Erőforrás hiány
- Egyéb

SWOT analízis (C4-C7)

C4 - Milyen erősségei vannak a textilhulladék újrahasznosítási eljárásainak? (több válasz is lehetséges)

- Egy-frakciós
- Szeparált nyilvántartás
- Nagy mennyiségek
- Rendszeres hulladékképződés
- Értékes hulladék
- Az újrahasznosító cég kis távolságban van
- Egyéb

C5 - Milyen gyengeségei vannak a textilhulladék újrahasznosítási eljárásainak? (több válasz is lehetséges)

- Nem meghatározott hulladék
- Kis mennyiségek
- Nem rendszeres a hulladékképződés
- Rossz minőségű hulladék
- Az újrahasznosító cég nagy távolságban van
- Egyéb

C6 - Milyen lehetőségek vannak a textilhulladék újrahasznosítási eljárásaiban? (több válasz is lehetséges)

- Hulladék újrahasznosítás saját cégen belül (termelési ciklus)
- Újrafelhasználás a termelésben (saját vagy más cégnél)
- Hulladék továbbítás egy újrahasznosítási platformon keresztül
- Befektetés új technológiákba/pályázás finanszírozásra

- Tevékenységek a kutatás-fejlesztés területén)
- Egyéb

**C7 - Milyen veszélyek vannak a textilhulladék újrahasznosítási eljárásaiban?
(több válasz is lehetséges)**

- Magas feldolgozási költségek
- Szükséges befektetés a problémák megoldásába (további költségek)
- Piaci elfogadás hiánya az újrahasznosított termékek iránt
- Szennyezett hulladék, amik esetében például nincs lehetőség feldolgozásra
- Jogi szabályozás/rendelkezés (például REACH)
- Egyéb

10. Annex 5 - M3P Platform Screenshots

Login on Material Match Making Platform (<https://materialmatch.eu/admin/security/login>)

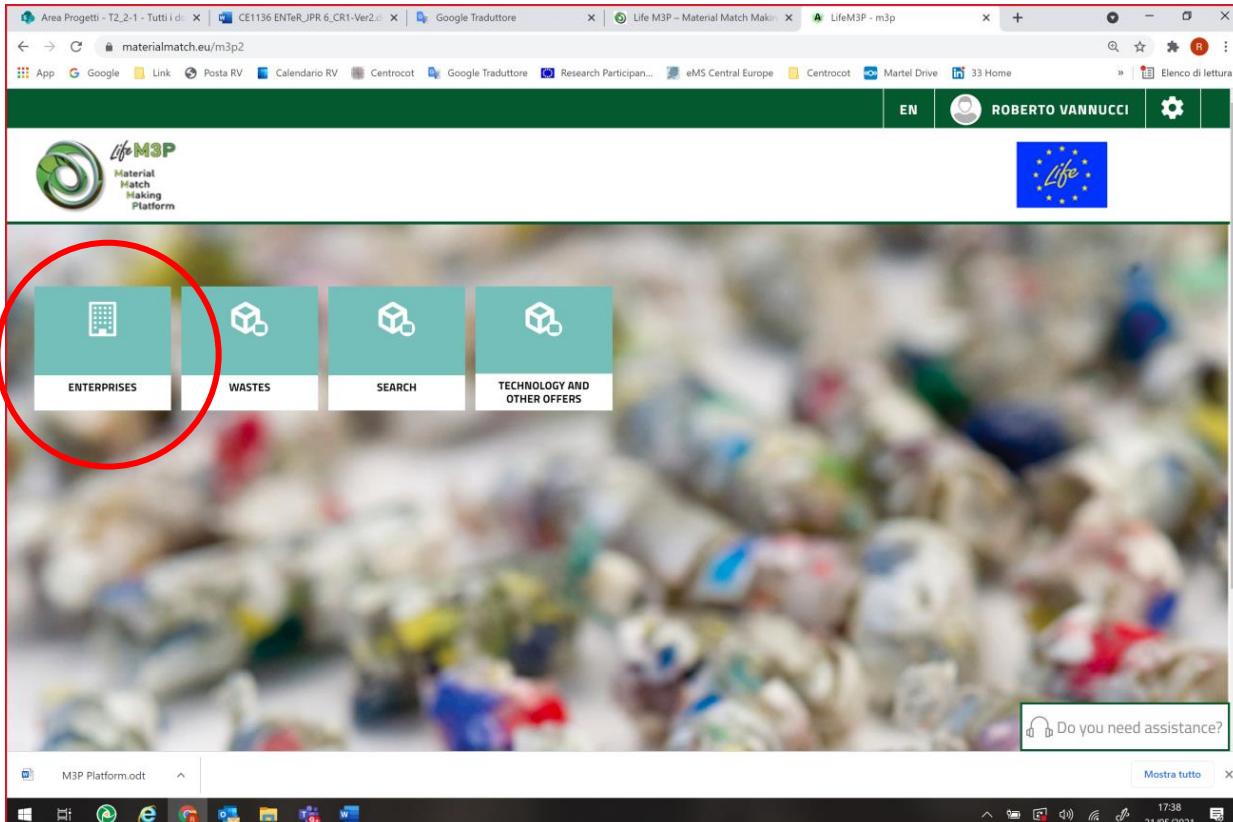

Entering on M3P

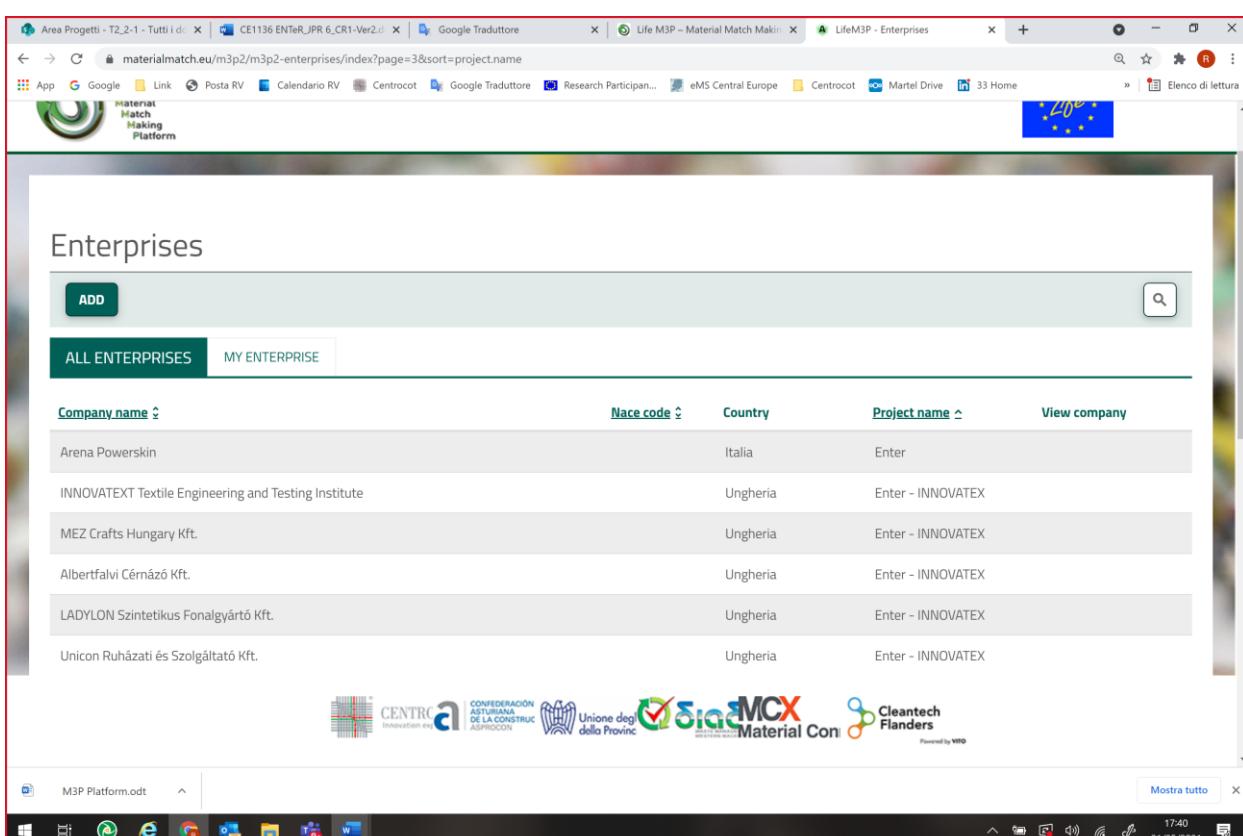

Looking at Enterprises

The screenshot shows the homepage of the Life M3P platform. At the top, there is a navigation bar with various links and a user profile for ROBERTO VANNUCCI. Below the navigation bar is a banner featuring the Life M3P logo and the European Union flag. A large red circle highlights the 'ENTERPRISES' button, which is part of a row of four buttons labeled 'ENTERPRISES', 'WASTES', 'SEARCH', and 'TECHNOLOGY AND OTHER OFFERS'. The background of the page is a blurred image of a pile of colorful waste materials.

The screenshot shows the 'Enterprises' section of the Life M3P platform. The page title is 'Enterprises'. There is a search bar and a button labeled 'ADD'. Below the search bar, there are two tabs: 'ALL ENTERPRISES' (which is selected) and 'MY ENTERPRISE'. The main content area displays a table of company information:

Company name	Nace code	Country	Project name	View company
Arena Powerskin		Italia	Enter	View company
INNOVATEX Textile Engineering and Testing Institute		Ungheria	Enter - INNOVATEX	View company
MEZ Crafts Hungary Kft.		Ungheria	Enter - INNOVATEX	View company
Albertfalvi Cénnázó Kft.		Ungheria	Enter - INNOVATEX	View company
LADYLON Szintetikus Fonalgyártó Kft.		Ungheria	Enter - INNOVATEX	View company
Unicon Ruházati és Szolgáltató Kft.		Ungheria	Enter - INNOVATEX	View company

At the bottom of the page, there are logos for several partners: CENTRO Innovation, CONFEDERACIÓN ASTURIANA DE LA CONSTRUCCIÓN, Unione degli Sviluppi della Provincia, SIACOMX Material Con, and Cleantech Flanders.

Looking at waste

The screenshot shows the homepage of the Life M3P platform. At the top, there's a navigation bar with links like 'App', 'Google', 'Link', 'Posta RV', 'Calendario RV', 'Centrocot', 'Google Traduttore', 'Research Participants', 'eMS Central Europe', 'Centrocot', 'Martel Drive', and '33 Home'. On the right side of the header, there are language selection ('EN'), user profile ('ROBERTO VANNUCCI'), and settings icons. Below the header, the 'Life M3P' logo is on the left, and a 'Life' EU flag is on the right. The main menu has four items: 'ENTERPRISES' (selected), 'WASTES' (highlighted with a red circle), 'SEARCH', and 'TECHNOLOGY AND OTHER OFFERS'. The background of the page is a blurred image of a pile of mixed waste. In the bottom right corner, there's a button labeled 'Do you need assistance?' with a phone icon.

The screenshot shows the 'Wastes' section of the platform. At the top, there's a header with 'ADD' and a search icon. Below it, there are three tabs: 'ALL WASTES' (selected), 'WASTES CREATED BY ME', and 'MY COMPANY WASTES'. The main area is a table with the following columns: Name, E.W.C., Qty, unit, Freq, Company, and Project. The table contains the following data:

Name	E.W.C.	Qty	unit	Freq	Company	Project
sodium hydroxide (solution in water)	/	99	tonnellate/anno	weekly	LifeM3P	
Dehydrated fruit pomace (berry)	/	20	tonnellate/anno	weekly	LifeM3P	
Stock postconsumer workwear finished garment	04.02.09	2.5	tonnellate/anno	annual	Enter	
Demolition and construction wastes	170109	40000	tonnellate/anno	weekly	LifeM3P	
Materie Plastiche - ABS	191204	70	tonnellate/anno	seasonal	Enter	
Polipropilene Macinato Floreale	191204	20	tonnellate/anno	seasonal	Enter	

At the bottom of the page, there are logos for CENTROCOT, CONFEDERACION ASOCIACIONES LA CONSTRUCCION ASPIRCION, Unione delle Province, MCX Material Con, and Cleantech Flanders. The footer shows the same browser tabs and system status as the first screenshot.
