📍 Update March 2020

💬 ECOS4IN WP1: SUMMARY AND RESULTS

👤 ECOS4IN - Department of Management, Ca' Foscari University of Venice

INDUSTRY 4.0: DEFINITION

“The integration of information and communication technology into the industrial environment” Schuh et al. (2014)

“The increasing digitization of the entire supply chain, which makes it possible to connect actors, objects and systems based on real-time data exchange” (Dorst et al., 2015; Spath et al., 2013).

Four pillars:

1. **Cyber physical systems (CPSs)** → the “integrations of computation and physical processes. Embedded computers and networks monitor and control the physical processes, usually with feedback loops where physical processes affect computations and vice versa.” (Lee, 2008).
2. **Internet of things (IoTs)** → considers “‘things’ and ‘objects’, such as RFID, sensors, actuators, mobile phones, which (...) interact with each other and cooperate with their neighboring ‘smart’ components, to reach common goals” (Giusto et al., 2010)
3. **Smart factories** → combines the notions of IoTs and CPSs and by placing them inside the working space and at the core of operations.
4. **Internet of services** → based on the concept that services are available through the internet so that private users and/or companies can create, combine and offer new kind of value-added services (Hofmann & Rüsch, 2017)

INDUSTRY 4.0: ENABLING TECHNOLOGIES

The Key Technologies of I4.0 (Alcácer & Cruz-Machado, 2019):

1. The Industrial Internet of Things
2. Cloud Computing
3. Big Data and analytics
4. Simulation
5. Augmented Reality
6. Additive Manufacturing (products and process innovations realized through virtual reality simulations)
7. Horizontal and Vertical Systems Integration
8. Autonomous Robots
9. Cybersecurity

WP1 - EXPECTED DELIVERABLES

- × Reports on existing infrastructure for Industry 4.0 in Europe:
 - **Methods** (Unive)
 - **Partners' reports** (all partners - mapping of economic structure, species, and relevant policies)
- × **Regional stakeholder meetings** in all partners regions
- × **Creation of the knowledge base**

ECONOMIC STRUCTURE

Aim:

- × Mapping the economic and social structure of the region
- × Unpacking data and figures related the current readiness of economic operators in terms of digital transformation and industry 4.0, as well as to the indicators of potential evolution.
- × Comparing regional data

SPECIES

Aim:

- × Mapping actors / institutions involved industry 4.0 / digital initiatives;
- × Focus on universities and education institutions; research centres/labs (private and public); technology transfer entities; consultancy firms, technology providers; public institutions

POLICIES

Aim:

- × Unpacking the most relevant policies and initiatives related to Industry 4.0, particularly for (not not limited to) SMEs;
- × Understanding the state of implementation of Industry 4.0 in the partners' regions, their receptiveness and narrative around its objectives and importance, and the results achieved.

MAPPING RESULTS

ECONOMIC AND SOCIAL STRUCTURE

ECONOMIC AND DEMOGRAPHIC INDICATORS (SOURCE: EUROSTAT)

- × GDP (2017)
- × Total population
- × Population aged 20-34 and over 65
(% on tot), ratio over 65/20-34
- × (%) Population with tertiary
education (ISCED lev. 5-8, 25-64 Y)
- × (%) Population with upper
secondary and post-secondary
(ISCED lev. 3-4, 25-64 Y)
- × (%) Employment 25-64 Y
- × (%) Unemployment 15-74 Y
- × (%) HRST on total employed
individuals

Total population (2018, thousands)

Population age (2018)

Usti Region (Severozápad including Karlovy Vary Region) (CZ)

Veneto (IT)

Malopolskie (PL)

Lombardia (IT)

West Transdanubia (Nyugat- Dunántúl) (HU)

North Croatia (Kontinentalna Hrvatska) (HR)

Upper Austria (Oberösterreich) (AT31)

Level of Education (2018)

(%) Population with tertiary education (ISCED lev. 5-8, 25-64 Y)

(%) Population with upper secondary and post secondary (ISCED lev. 3-4, 25-64 Y)

Employment and HRST

BUSINESS DEMOGRAPHY

(SOURCE: EUROSTAT)

- × Number of firms (2016)
- × Number of high-growth firms (2016)
- × 3 years old enterprises share of the business population (2016)
- × Average company size

Average company size

North Croatia (Kontinentalna Hrvatska) (HR)

7,88

Upper Austria (Oberösterreich) (AT31)

6,55

Lombardia (IT)

4,73

West Transdanubia (Nyugat- Dunántúl) (HU)

4,37

TAKING COOPERATION FORWARD

INNOVATION INDICATORS

(SOURCE: RIS 2019)

- × Overall Innovation Performance (RIS 2019) relative to EU performance
- × Innovation performance group (RIS 2019)
- × Innovation performance change (RIS 2011-2019)
- × Firms' R&D VS non-R&D spending
- × R&D spending in public VS business sector
- × SMEs innovation activities
- × Sales of new-to market and new-to-firm innovations (as % of turnover)
- × SMEs collaboration indicators

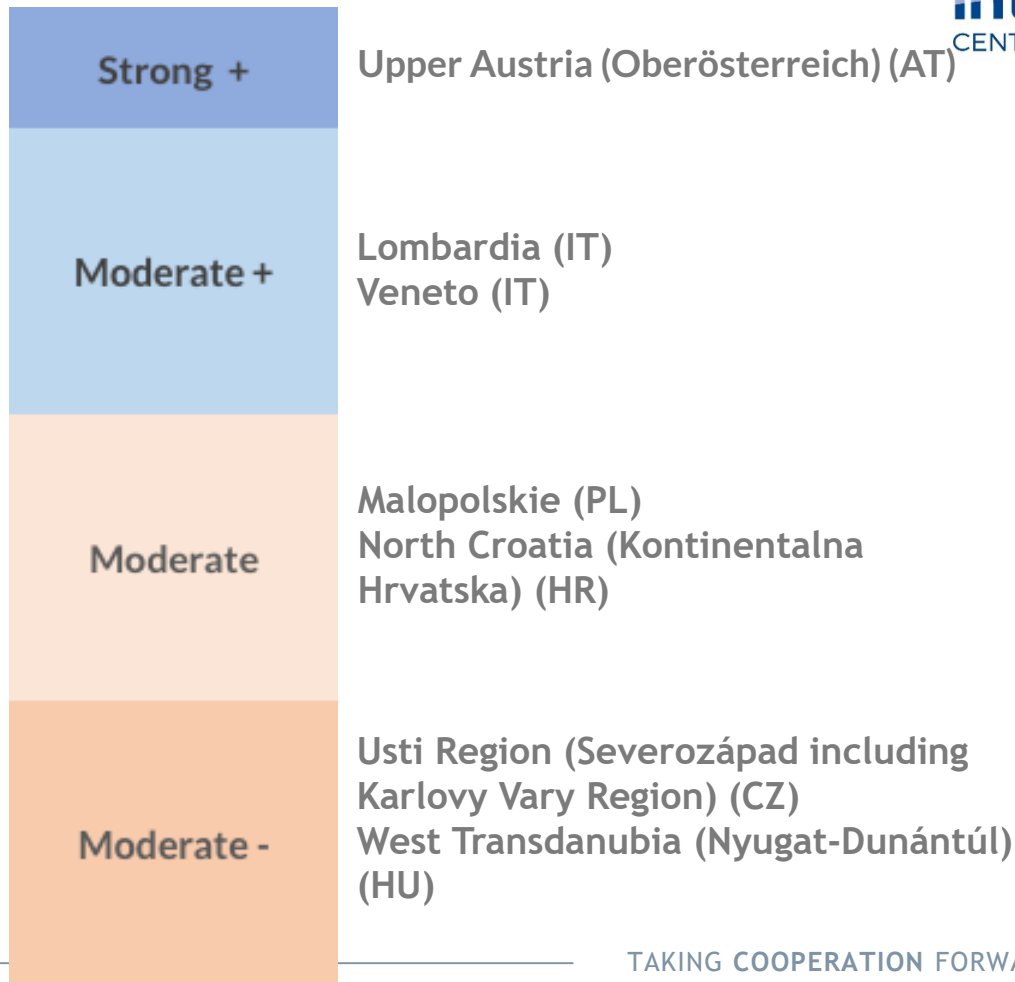

INNOVATION PERFORMANCE GROUPS (2019)

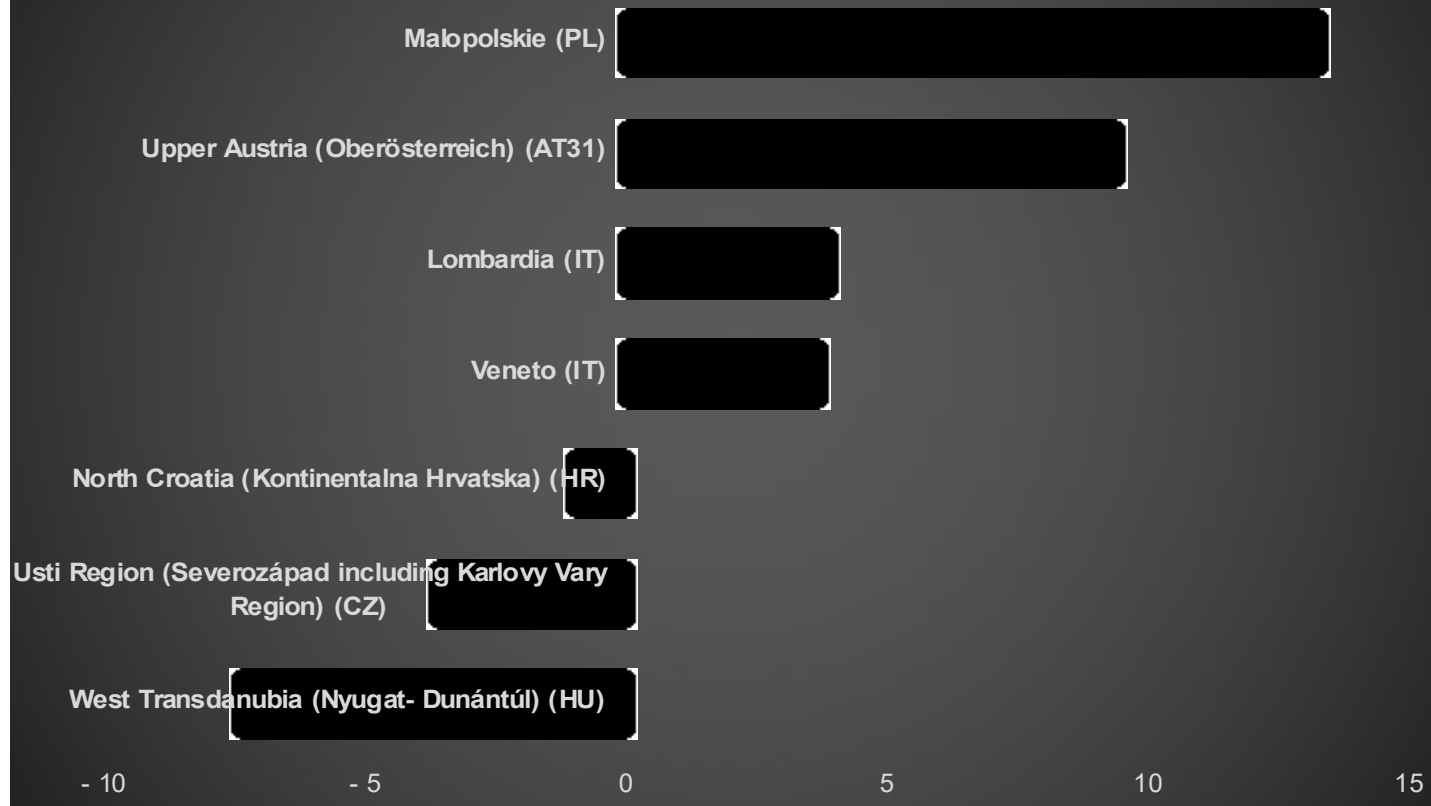

Source: RIS 2019

Definition: grouping based on each region's innovation performance relative the EU average.

- Strong Innovators: performance more than 20% above the EU average and between 90% and 120% of the EU average.
- Moderate Innovators: performance between 50% and 90% of the EU average.

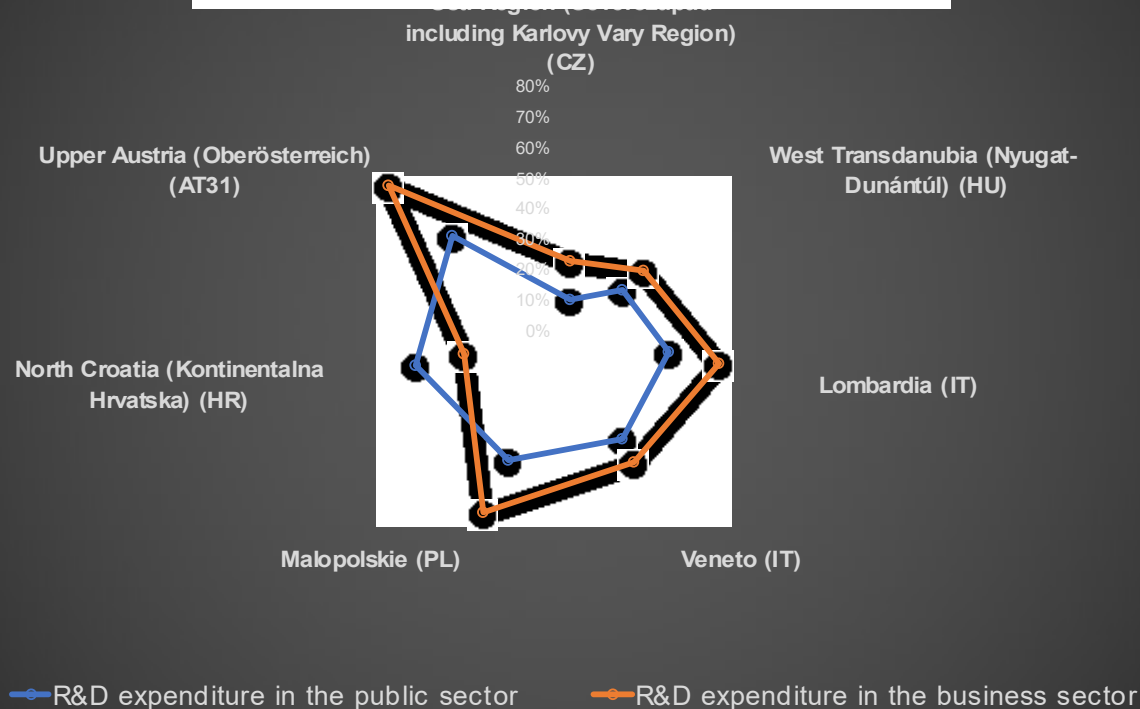

Performance change (RIS 201 2011)

Source: RIS 2019, definition: the RII indicates the performance in 2019 relative to that of 2011.

R&D spending in public VS business sector

Firms' R&D VS no R&D spending

SMEs innovation activities

Sales of new products to market and new firm innovations (as % of turnover)

SMEs collaboration indicators

SPECIES

RELEVANT ACTORS (CATEGORIES)

- × Development agency
- × Public institution
- × Private/Public consortia
- × Research & Technology Organization
 - Research Center
- × Research & Technology Organization
 - University
- × Technology/service provider - startup
- × Technology/service provider - large company
- × Consulting company
- × Science Park/Hub
- × FabLab

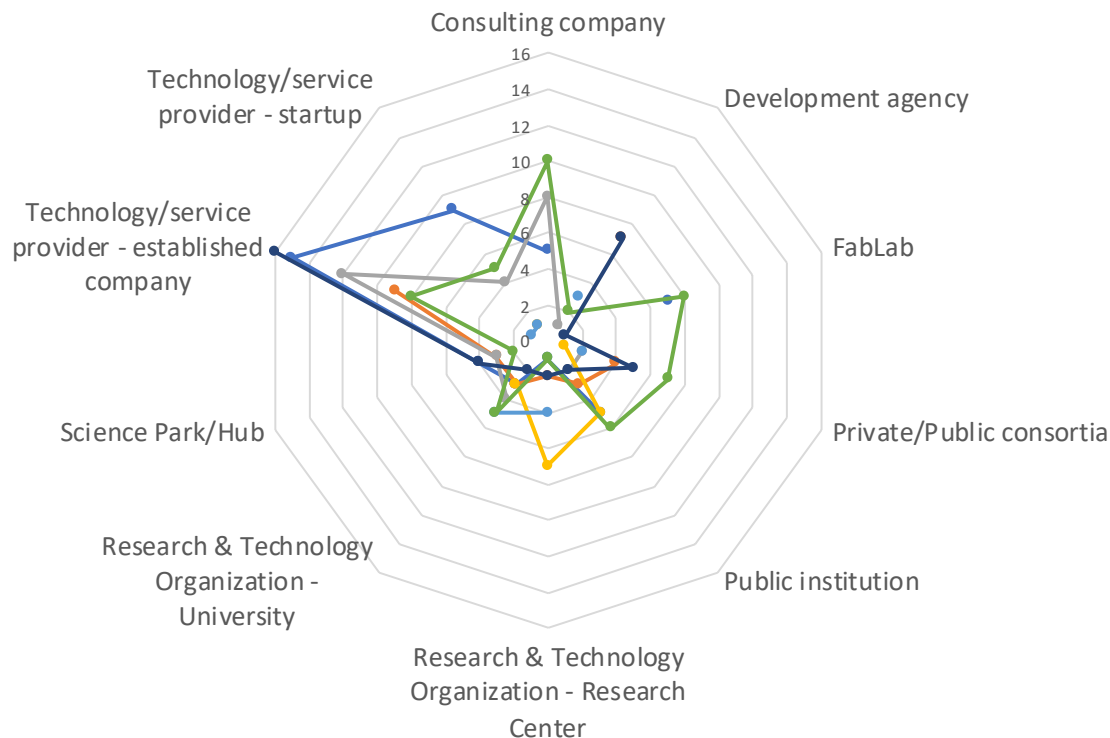

N. of reported organizations per region

Reported species in all regions

—●— Lombardia (ITC4)

—●— Małopolska (PL)

—●— North Croatia (Kontinentalna Hrvatska) (HR)

—●— Upper Austria (Oberösterreich) (AT31)

—●— Usti Region (for RIS as Severozápad including Karlovy Vary Region) (CZ)

—●— Veneto (IT)

—●— West Transdanubia (Nyugat-Dunántúl) (HU)

Regional Technology Specializations

NORTH CROATIA (KONTINENTALNA HRVATSKA) (HR)

A word cloud of technology specializations. The words are arranged in a cluster, with 'Digital-Strategy' and 'Digital-Assessment' being the largest. Other prominent words include 'Robotics', 'Artificial-Intelligence', 'Additive-Manufacturing', 'Design', 'Sensors', 'IoT', and 'Actuators-Networks'. The words are in various shades of blue and are set against a background with a large, faint 'X' shape.

Artificial-Intelligence
Additive-Manufacturing

POLICIES

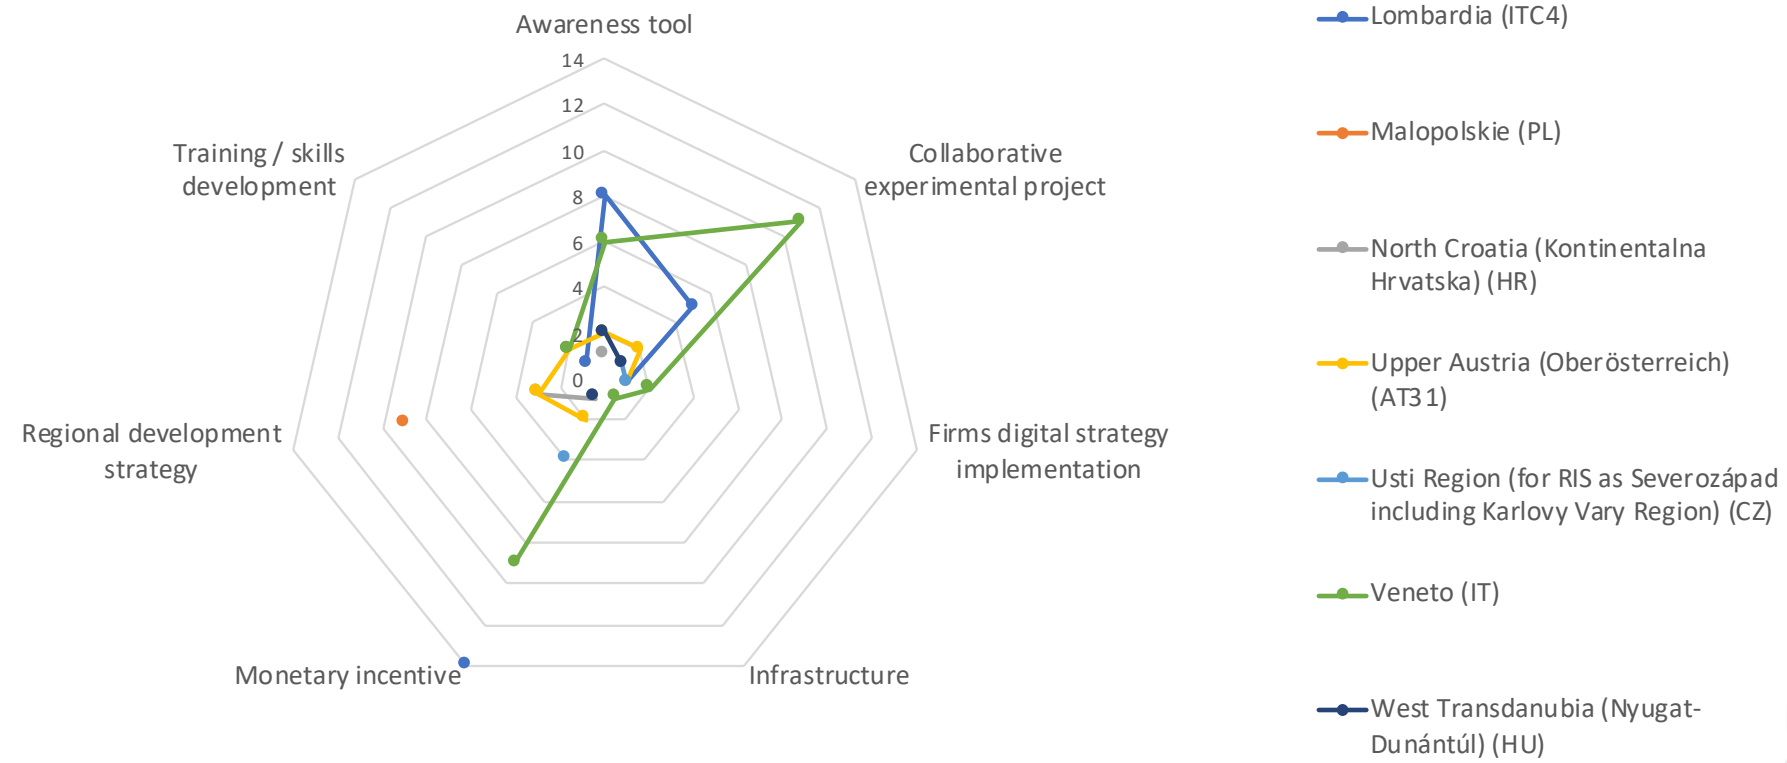

POLICIES CLASSIFICATION

- × Awareness tool
- × Collaborative experimental project
- × Firms' digital strategy implementation
- × Infrastructure (e.g., connectivity)
- × Monetary incentive
- × Regional development strategy
- × Training/skills development

Policies distribution by region

THANK YOU FOR YOUR ATTENTION.
