Report from workshop meeting No. 2: "Technical workshop on the revised energy plans: presentation of the top three selected projects" (D.T1.2.5) as part of the implementation of the ENES-CE project by the Municipality of Koper

The 2nd meeting took place in the headquarters of the City Municipality of Koper on Tuesday 22th of September 2020. The meeting started at 10.00 a.m. and concluded at 12.00 a.m.

Participants:

1. Darka Jezeršek Žerjal, MOK
2. Ivana Štrkalj, MOK
3. Vili Plahuta, MOK
4. Debora Kokot, MOK
5. David Cah, MOK
6. Boštjan Mljač, GOLEA
7. Slavko Mezek, RRC Koper
8. Tina Matekovič, RRC Koper
9. Jadran Čalija, citizen MOK
10. David Tomovski, citizen MOK
11. David Trošt, citizen MOK

Agenda:

1. Presentation of ENES-CE project
2. Presentation of existing and revised local energy concept of the City Municipality of Koper and presentation of top 3 selected pilot projects
3. Discussion

Ad 1: Presentation of ENES-CE project

I. Štrkalj from the department for strategical planning and development projects from City Municipality of Koper announces the workshop agenda and presents the activities, that municipality has carried out so far in the field of CO₂ emission reduction.

D. Jezeršek Žerjal from the department for strategical planning and development projects from City Municipality of Koper presents the Central Europe Interreg project ENES-CE, where the City Municipality of Koper acts as a project partner and GOLEA agency offers a technical support to the municipality. ENES-CE project challenge is to improve the adoption and quality of energy plans with a bottom up quadruple helix approach, where citizens play a pivotal role.

Ad 2: Presentation of existing and revised local energy concept of the City Municipality of Koper and presentation of n.3 best evaluated pilot projects

B. Mljač presents initially the GOLEA agency - public institution established within the frame of EU programme »Intelligent Energy Europe«.

B. Mljač presents that the first Local energy concept of the City Municipality of Koper was elaborated in 2008 which was updated in 2013. On this basis, a baseline emission inventory was prepared in 2019 for Sustainable energy action plan - SEAP. In the years, 2020 and 2021 a new Local energy concept and Sustainable Energy and Climate Action Plan of City Municipality of Koper are in process of elaboration.

Furtherly B. Mljač presents the SECAP project within the frame of SLO-IT programme, the municipality's commitments linked to the Covenant of Mayors adherence for Climate and Energy, and key sectors which are subject of local energy concept (LEK) and Sustainable Energy and Climate Action Plan (SECAP).

B. Mljač summarizes the key findings of two analysis that were carried out within ENES-CE project: Energy Roadmap and Assessment of the need to set up an energy group - cooperative in the City municipality of Koper.

A presentation of three best evaluated pilot projects followed:

1. Business model for an energy cooperative in the City of Koper,
2. Business model for an energy cooperative in the countryside of MOK,
3. Smart lighting - modernisation of public lighting in MOK.

Ad 3: Discussion

In the field of joint projects, the implementation of solar power plant within the cooperative in rural areas is encouraged. There are increased possibilities of solar power plants installation on some of the facilities of local communities (for example Sveti Anton Local community). The potential and interest of other local communities should be additionally examined. Enhanced promotion and animation of stakeholders are crucial for a successful implementation of joint projects.

Agreement on future meetings:

B. Mljač explains that within the project ENES-CE additional meetings are foreseen.

Participants were invited to send additional comment/suggestions on the following e-mail address bostjan.mljac@golea.si.
