TARGETED EVENTS

D.C.5.3. DOCUMENTATION PANEL DISCUSSION 01

WP C - COMMUNICATION

June, 2018

Lead Institution	LP - BMNT
Contributor/s	
Lead Author/s	Elisabeth Gerhardt
Date last release	29.06.2018

Contributors, name and surname	Institution
Elisabeth Gerhardt	Federal Research and Training Centre for Forests, Natural Hazards and Landscape
Gudrun Schrömmner	Prisma solutions

TABLE OF CONTENTS

1. Summary	3
2. Fotos	5
3. Feed-back questionnaire for the first Panel discussion	7
4. Participation List	8

1. Summary

The Panel discussion 1 was implemented during the midterm conference in Ljubljana on June 13th, 2018 (back to back with the Round Table 1 on June 12th, 2018, earlier than due to the AF as the LP decided to combine the mid-term-conference of PROLINE-CE with another project within Danube Transnational Programme - CAMARO-D. One of the main goals was to serve as a valuable final input for the development of two major outputs of PROLINE-CE: the Action plan of WP T2 (Output O.T2.4) and GOWARE of WP T3 (Output O.T3.1 - Transnational Guide towards and optimal water regime).

Beforehand, the respective key stakeholders had been informed by the WP-Leaders/LP about pilot action cluster reports, the transnational report about already elaborated documents and working steps respectively foreseen activities within previous WPs.

First of all, three presentations were held by the WP-Leaders responsible for WP T1 (already finalised), for the Action Plan of WP T2 and for GOWARE (WPT3). They provided first insights in the main already developed outcomes respectively foreseen activities of PROLINE-CE for the audience to get informed. As this Panel discussion was conducted together with CAMARO-D to foster synergy effects also the main outcomes resp. activities of this project were presented to get a broad overview about the thematic issues of these two projects.

For the following discussion, the key-note speakers were selected according to their expert-knowledge, coming from different fields of action (agro-meteorology, agriculture, water management, forestry, spatial planning), the following discussion was moderated by an expert.

It resulted from the discussion that a lot of gaps are known and that at this stage it is important to bring people together in order to improve the process. Decision makers have to be addressed, but often these are stakeholders with conflicts of interest. It is always a question of who will benefit/who will pay?

So the projects should find answers:

- Are there common interests?
- Are there synergies that can be created?
- Can we define measures allowing a stepwise implementation - Based already on existing studies, etc.

A project should define different principals, even formulated on different levels of detail and it should also try to define workflows how the different scales can be linked (regional, national, European). For this, eventually, the dialogue between different stakeholders is of utmost importance, this is why the projects have a multi-sectoral approach! Within a project, different stakeholders can discuss in detail in a different surrounding - as a starting point to search for solutions.

Generally it was stated, that during a project-lifetime of max 3 years, it is hardly possible to bring things into implementation - too often the involvement of the relevant institutions needs much more time. The lowest bureaucracy-level is on a local scale, but even here a lot of persuasive efforts have to be taken.

Concerning the status quo aimed after the event, the expert inputs are contributing to the further development of the project.

3. Feed-back questionnaire for the first Panel discussion

As foreseen in the AF, a feedback questionnaire was distributed and evaluated: about half of the participants filled in the questionnaire, the evaluation showed that around 85% ticked 5 or 4, concerning the quality of the event.

PROLINE-CE/CAMARO-D Mid-term-conference/round table (13.06.18, Ljubljana)							
Feedback Questionnaire							
	Value 1	Value 2	Value 3	Value 4	Value 5	n.a.	
Total number:	6	14	79	216	342	3	660
Percent	1%	2%	12%	33%	52%	0%	100%

4. Participation List

Since the panel discussion 01 was carried out during the midterm-conference, the participation-list is identical.
