

How to reach energy efficiency in buildings?

Problems

Financial limitations

Ownership of the buildings

Lack of knowledge with public officers

Decision making progress is taking to long

Inhabitans are not enough informed - lack of knowledge

Adjust comfort of inhabitants with EE

Difficulties with historiacal buildings - increased costs and investments

Low energy prices in some countries

Solutions

Trigger innovative financial e.g. EPC, more apropriate FI

Capacity building of public officers especially regarding FI

informed about specific solutions - public campaings, catchy

Ideas

Securing funds, good match of fundings, subsidies for buildings, new funds are coming e.g. renovation wave
