Are you looking for new ideas or technical suggestions on how to improve public transport in peripheral areas?

Consult the latest project **Outputs** for better connecting peripheral areas:

✓ **16 SMACKER ACTION PLANS** developed in the 6 pilot areas and in the 10 follower regions of the Enlarged Transfer Programme.

✓ **5 GUIDELINES ON DRT AND SMART MOBILITY SOLUTIONS** providing targeted technical information for policy authorities, public transport service providers, users, business and enterprises.

TOOLBOX

TOOLBOX FOR DRT SERVICES, BEHAVIOUR CHANGE AND SMART MOBILITY PRACTICES

The SMACKER Toolbox makes the main results of the project available for consultation. Research studies and practical experience reports on DRT service development and improvement, together with good practices on behavioural change and smart mobility are searchable and reachable through a system of tags that include locations, strategies, tools and step-by-step guidance.

SMACKER FINAL CONFERENCE

SMACKER Final Conference is held in Vienna on 24.05.2022.

Full information and the material presented during this public event are available just framing the QR code.
