International Workshop on Energy Performance Contracts and Demand Side Management experiences and case studies

How can Public Administrations be efficient through energy reduction?
I Transnational Workshop about Energy Performance Contracts and
Demand Side Management

The Interreg CENTRAL EUROPE 2014-2020 “TOGETHER - Towards a Goal of Efficiency Through Energy Reduction” aims at encouraging the CENTRAL EUROPE Public Administrations to improve Energy Efficiency in their buildings also by involving users in energy management, and to change their atomistic vision into a holistic vision of the buildings as a whole of functions and relationships between physical space, technological devices and users’ needs-behaviour.

Are technological interventions the only possible tool for triggering energy efficiency? How can energy performance contracts support energy efficiency? How can end-users’ behaviour be part of the energy efficiency strategy of the owners of a building?

This workshop tackles energy efficiency under two main perspectives:

- Energy Performance Contracts. Such contracts usually include a guarantee from the provider on the achievement of specific energy saving targets;
- Demand Side Management, i.e. the modification of consumers’ demand for energy through various methods such as incentives and education.

The workshop will show how to modify consumers’ behaviour and their energy demand through various methods, such as financial incentives and education, with concrete cases and practical experiences, and with the support of field experts and ambassadors of other EU funded projects!

The aim of the workshop is to let participants think outside the box and make them aware of different integrated perspectives that may trigger energy efficiency!

Agenda

- 9.00 Welcome
Mr Pavel Pacal, Vice-President of the Vysočina Region - (CZ)
- 9.05 Introduction of the aim and programme of the workshop and reference to the TOGETHER project
Ms Martina Kuchařová, EAV - (CZ)
- 9.10 Energy Performance Contracts: what are they?
Mr Libor Gazovic, SIEA Slovak Innovation and Energy Agency - (SK)
- 9.25 Energy Performance Contracts: a European perspective: benefits and challenges
Mr Libor Gazovic, SIEA Slovak Innovation and Energy Agency - (SK)
- 9.45 Best practice - the Energy Performance Contract in Jihlava's hospital case - the Energy Performance Contract in Jihlava's hospital
Mr Petr Šebesta, Jihlava's hospital - (CZ)
- 10.00 Best practice - Treviso's Energy Performance Contract and the enhancement of the social component
Mr Antonio Zonta, TOGETHER Project Coordinator - (IT)
- 10.15 Short break
- 10.45 Introducing Behavioural vs Analytical Demand Side Management
Mr Antonio Zonta, TOGETHER Project Coordinator - (IT)
- 11.00 Demand Side Management: a new way of thinking energy efficiency? How to stimulate energy efficiency through DSM improvements in educational buildings, institutional buildings and other types of public buildings? Experiences linked to behavioural sciences principles and showcases
Mr Manuel Nina, Expert at the TOGETHER Krakow Training of Trainers - (PT)
- 12.00 Investing in Building Energy Monitoring Systems and analytic approaches
Mr Petr Komínek, Enlytech s.r.o. - (CZ)
- 12.20 Short break
- 12.50 Investing in users' engagement and behavioural changes: cross-fertilisation and exchange of experiences with the running Interreg CENTRAL EUROPE Project "Energy@School"
Ms Elena Casiraghi and Mr Luca Laghi, CERTIMAC - (IT)
- 13.10 Horizon Project "GreenPlay"
Mr Csoknyai Tamás, Budapest University of Technology and Economics - (HU)
- 13.30 Question time and conclusions
Moderator: Ms Martina Kuchařová
- 14.00 Closure of the day
