LINZ CENTER OF MECHATRONICS

Version 1

The Linz Center of Mechatronics GmbH (LCM) stands for the reliable implementation of the latest research findings into marketable solutions and products that are precisely tailored to the needs of our customers.

The integration of various technologies into one complete solution is what we specialize in. We use the latest technologies from mechatronics, automation, digital product development, and artificial intelligence. The many years of experience and know-how of our employees enable the successful development of new, networked, or autonomous systems. Our teamwork is characterized by intensive and lively discussions, mutual respect, and professionalism in everything we do. The overarching objective throughout all of our activities is excellence, both professionally and in our cooperation.

In the K2 Competence Center „Symbiotic Mechatronics“, LCM unites science and industry. We are committed to successfully transferring new technologies and methodologies to the industrial environment in the form of profitable and innovative solutions.

Symbiotic Mechatronics represents the beneficial integration of mechatronic core components: Mechatronic Systems (Industrial Internet-of-Things, electric and hydraulic drives, Simulation, etc.), their elements and their respective physical, digital and human environments.

Transform4.0

Our longstanding cooperation with renowned international research partners guarantees our customers that the latest technologies are applied. Our experts have sound methodological expertise in the use of artificial intelligence, the Internet of Things, and digital product development. These methods are used in the development of predictive systems and components as well as for automation solutions.

We offer our expertise and experience from idea to finished product. We integrate the necessary technologies into an overall system and support you along the entire innovation chain—from scientific research to finished product.

Our highly qualified staff offer the best possible support during every phase. We will assist you from the initial idea through to the implementation of a marketable product. As we know what our customers need, we are able to act swiftly and reliably. Depending on the task at hand, the customers are supported by a SINGLE project manager as their contact person for all domains. The main focus is always on the best possible implementation of the project in accordance with the industrial standards.
