
**D.T3.3.2 REPORT ON THE INITIAL
INVESTMENT CAPITAL FOR THE
REGIONAL INDUSTRIAL ALLIANCES IN
PF**

Version 1
05 | 2022

CAP 2 - Deliverable D.T3.3.2 Report on the initial investment capital for the regional industrial alliances in PF

In this deliverable we explain what are the possible funds from which to draw to enhance the PF in the different regional realities and where possible we add a national focus.

We believe that to promote the action of the proposed transnational alliance it makes more sense to draw on the possibilities of public or para-public funds, vouchers or the like, rather than on individual shares with private banks.

In fact, the purpose of the alliance is to make these basins of funds (tenders, vouchers) etc. fall back on the companies themselves in the area. promoting their existence, spreading access, etc.

The use of more classic funds (bank loans) is a less innovative channel and to which normal companies can normally also access in personal form.

In this regard, please refer to the various Regional Action Plans, created in the deliverable D.T3.1.5 regional action

Together with this there is a focus on possible national funds. In particular, the reference is the website <https://www.incentiviagricoltura.it/>
